

§ 930.58 Necessary data and information.

(a) The applicant shall furnish the State agency with necessary data and information along with the consistency certification. Such information and data shall include the following:

(1) A detailed description of the proposed activity, its associated facilities, the coastal effects, and comprehensive data and information sufficient to support the applicant's consistency certification. Maps, diagrams, technical data and other relevant material shall be submitted when a written description alone will not adequately describe the proposal (a copy of the federal application and all supporting material provided to the Federal agency should also be submitted to the State agency);

(2) Information specifically identified in the management program as required necessary data and information for an applicant's consistency certification. The management program as originally approved or amended (pursuant to 15 CFR part 923, subpart H) may describe data and information necessary to assess the consistency of federal license or permit activities. Necessary data and information may include State or local government permits or permit applications which are required for the proposed activity. Required data and information may not include confidential and proprietary material; and

(3) An evaluation that includes a set of findings relating the coastal effects of the proposal and its associated facilities to the relevant enforceable policies of the management program. Applicants shall demonstrate that the activity will be consistent with the enforceable policies of the management program. Applicants shall demonstrate adequate consideration of policies which are in the nature of recommendations. Applicants need not make findings with respect to coastal effects for which the management program does not contain enforceable or recommended policies.

(b) At the request of the applicant, interested parties who have access to information and data required by this section may provide the State agency with all or part of the material required. Furthermore, upon request by

the applicant, the State agency shall provide assistance for developing the assessment and findings required by this section.

(c) When satisfied that adequate protection against public disclosure exists, applicants should provide the State agency with confidential and proprietary information which the State agency maintains is necessary to make a reasoned decision on the consistency of the proposal. State agency requests for such information must be related to the necessity of having such information to assess adequately the coastal effects of the proposal.

§ 930.59 Multiple permit review.

(a) Applicants shall, to the extent practicable, consolidate related federal license or permit activities affecting any coastal use or resource for State agency review. State agencies shall, to the extent practicable, provide applicants with a "one-stop" multiple permit review for consolidated permits to minimize duplication of effort and to avoid unnecessary delays.

(b) A State agency objection to one or more of the license or permit activities submitted for consolidated review shall not prevent the applicant from receiving Federal agency approval for those license or permit activities found to be consistent with the management program.

§ 930.60 Commencement of State agency review.

(a) Except as provided in § 930.54(e) and paragraph (a)(1) of this section, State agency review of an applicant's consistency certification begins at the time the State agency receives a copy of the consistency certification, and the information and data required pursuant to § 930.58.

(1) If an applicant fails to submit a consistency certification in accordance with § 930.57, or fails to submit necessary data and information required pursuant to § 930.58, the State agency shall, within 30 days of receipt of the incomplete information, notify the applicant and the Federal agency of the missing certification or information, and that:

(i) The State agency's review has not yet begun, and that its review will
